## ABOUT US

A deep respect for nature, an uncompromising quest for quality and fastidious approach to detail is at the heart of everything we do - from the way we grow our grapes to the way we age our wines.

Our winemaking is a slow and measured process. We follow strict, self-imposed parameters to maintain our exacting quality standards, and we ensure the best expression of our wines by keeping intervention to an absolute minimum throughout production.

Once bottled, the wines spend time on their lees to add depth and once disgorged, extended cork ageing further enhances the complexity of our wines. We're happy to wait as long as it takes to achieve the perfect expression of our wines.

# SUSTAINABILITY

At Gusbourne, we continually strive to ensure our practices are kind to the world around us. As such, we are delighted to be a founding member of the Sustainable Wines of Great Britain initiative set up to encourage English and Welsh wineries to ensure their practices are as sustainable and environmentally friendly as possible. We proud to be one of the first vineyards in the UK to achieve the SWGB accreditation.

Some examples of our sustainable initiatives are:

- Experimentation: the level of experimentation is New World in style & drive for accelerated learning. Gusbourne is one of the key members of the NIAB EMR (East Malling) viticulture R&D consortium, with parts of the vineyard dedicated to industry-wide research & experimentation
- Wildflower blocks are planted near vineyards to encourage biodiversity
- Natural organic fertilisers (composts, seaweed and composted chicken manure) have always been employed in our vineyards to improve soil health and bacterial diversity
- Our bottles and packaging are also all made of recyclable materials. We continue to evaluate the sustainability of all areas of the Gusbourne business to achieve the most sustainable and environmentally friendly practices wherever we can
